Gregory Lehmann

**DOCUMENTATION NOTIFICATION FORM**  
UI Sports Medicine and University of Iowa Hospitals & Clinics (UIHC)

As part of an agreement between Regina High School and UI Sports Medicine, UI athletic trainers and physicians provide health care for sports-related injuries that occur while students are involved in school-related activities. Student-athletes and their families are not billed for any medical services provided at the school. Medical care is documented and shared only to the extent necessary to provide services. Please read and sign the enclosed Receipt of Privacy Notice and Consent to Release of Information forms and return to the school's athletic office or athletic trainer. The forms explain our practices and are required for compliance with federal guidelines related to use of protected health information.

In order to document services provided it may be necessary in some instances to create a medical record number (registration number) in the UIHC medical record system. There is no billing associated with this. If the student-athlete has already been seen at UIHC or one of its clinics, the existing medical record number will be utilized. If you would like to refrain from establishing a medical record number for your son or daughter, or if you have any questions regarding this process, please contact the UI Sports Medicine Outreach Program Director, Matt Doyle.

Sincerely,

Matt
